Losing a loved one to an overdose is difficult for the surviving family.

For children, the loss of a caregiver sometimes results in behaviors or emotions that are difficult to manage.

Supporting Children is here for your family.

If your child is experiencing emotional outbursts or behavioral concerns at home, school, and/or with peers, our licensed therapists can help.*

THIS PROGRAM IS FREE AND CONFIDENTIAL

Supporting Children is not grief counseling. This program provides therapy for children who are having difficulty managing their behavior and emotions. We will provide services in the location of your choosing.

Call / Text
988

If you or your child are having thoughts of suicide or are in crisis, call or text the 24/7 Crisis Team

Supporting Children helps children process the trauma of losing a parent to opioid overdose. The program utilizes the evidence-based intervention, Trauma Systems Therapy (TST), developed by NYU Langone Health. Case Western Reserve University provides program evaluation.
